## HIGHLIGHTS FOR THE FOURTH QUARTER 2010

### **The seasonally adjusted quarterly real Gross Domestic product (GDP) increased by 9.6 per cent in fourth quarter of 2010**

The biggest growth, comparing the value added for the fourth quarter 2011 with that for the fourth quarter 2010, was in the Service sector (+11.8%) followed by Industry sector (+10.6%), while the Agriculture sector growth rate amounts to 2.1 per cent.

The main contributor to the year-on-year seasonally adjusted growth of 9.6 per cent (in terms of value added: 8.8 per cent) were as follows:

- **Business and other services activities** growth (40.5%) was led by strong growth in the Legal, accounting and management consultancy as well as Architectural and engineering activities and related technical consultancy;
- **Other personal service activities** growth (30.3%) was led by a strong growth in the other service activities such as laundry, beauty treatment, and funeral related activities;
- The **Information & communication industry** (19.1%) was moved by a strong growth in telecommunication;
- **Transport & storage industry** growth (18.2%) were moved by other transport activities (storage and warehousing, travel agencies and tour operators activities), and cargo handling;
- The **Manufacturing industry** growth (17.6%) was led by strong growth in the publishing, printing and reproduction of recorded media, Manufacture of chemicals and chemical products, basic metal, fabricated metal products, and motor vehicles, trailers and semi-trailers.
- The **Forestry industry** increased by 12.9 per cent.

## NOTES

### Forthcoming issues

Issue	Expected date of publications
First quarter of 2011	June 29, 2011
Second quarter of 2011	September 28, 2011
Third quarter of 2011	December 21, 2011
Fourth quarter of 2011	March 28, 2012

### Explanatory notes

#### Introduction

This Statistical Release contains independently compiled quarterly estimates of the gross domestic product (GDP) for the period of first quarter of 2006 to fourth quarter of 2010. The estimates are based on the 1993 System of National Accounts (SNA), International Standard Industrial Classification Revision 4 published by the United Nations and other international organizations and Quarterly National Accounts Manual: Concepts, data sources, and compilation by International Monetary Fund (IMF). This means that the methodology, concepts and classifications, are in accordance with the guidelines and recommendations of an internationally agreed system of national accounts. The estimates of real GDP are expressed in terms of a 2006 base year.

#### Methodology

Short-term indicators are used to estimate the quarterly GDP (ref Quarterly National Accounts Manual: Concepts, Data sources, and Compilation - IMF) where Annual GDP estimates are calculated independently from the quarterly estimates. Other than that, annual GDP estimates are derived as the sum of the GDP for the four quarters.

#### Seasonal adjustment

The quarterly value added and GDP estimates have been seasonally adjusted. Seasonal adjustment is the process of estimating and removing seasonal effects from time series to reveal non-seasonal features. This process is to provide a clearer view of short term movements and trends and also to allow earlier identification of turning points
